deceuninck®

Deceuninck is a leading designer and manufacturer of high quality systems for **windows & doors, interior, roofline and cladding, and outdoor living** (terrace/claddings). Core technologies include **PVC extrusion** and Deceuninck's revolutionary **Twinson material**.

In the design and manufacturing of its windows & doors, interior, roofline and cladding systems, and outdoor living solutions, Deceuninck gives priority to **innovation** in materials, products and applications. These innovations include the **patented UV - resistant Solex coating** system and **Twinson** that merges the benefits of wood and PVC into a single base material. Deceuninck products combine this groundbreaking technology with the absolute best in timeless design, including an accent on natural colours. Deceuninck employs a **cradle - to - cradle** philosophy in its design and manufacturing. Its products provide years of quality service, after which they can be **fully recycled**. The Deceuninck group is active in **more than 75 countries** across **Europe, North America and Asia**, has **35 production and sales subsidiaries**, and is supported by some 2,800 employees worldwide. It has production facilities in the following countries:

- Belgium • France • Germany • Poland • Russia • Turkey • United Kingdom • United States

Deceuninck is quoted on the **Euronext stock exchange**. Its head office and coordination centre for the Group is located in Hooglede - Gits (Roeselare), Belgium.

Advantages & Qualities

Deceuninck windows and doors systems

Weather Resistance

More than any other building material, Deceuninck windows and doors excellent material properties are in use even after many years. As a matter of fact, they do not alter under extreme temperature or weathering.

High Security

High - stability windows and doors profiles made by Deceuninck offer the best solution for increased safety. Special fittings and glazing, qualified window fabrication and expert installation offer an enhanced security at various levels.

Maintenance Free

Deceuninck windows and doors system do not require regular repainting and expensive maintenance. They do not rot, warp nor corrode even in tropical and salty coastal climates. Therefore, their maintenance is reduced to simple cleaning and does not involve any further costs.

High Sound Insulation

The protection against noise is an essential characteristic of a modern window in order to ensure a comfortable life both at home and in the office.

Efficient Thermal Insulation

No matter in which climate Deceuninck windows and doors are installed - they contribute to a cosy and comfortable atmosphere in your home. As the design prevents thermal bridging, the thermal insulating performance of the finished window is exceptionally good.

Termite Resistance

In tropical climates wooden windows and doors are often destroyed by termites, whereas Deceuninck windows and doors systems are fully resistant to these insects. Thanks to the highly developed compound of Deceuninck windows and doors.

Behaviour In Case of Fire

Fire tests have shown that Deceuninck materials, being naturally flame retardant throughout their product life, will not cause, support or enhance the development of accidental fire. Unlike timber windows, the Deceuninck sections do not support combustion and are in fact self-extinguishing.

Maximum Water Tightness

Deceuninck windows and doors systems have been successfully used in swimming-pools, marine and ocean environments without detriment to the surface finish or performance. One of the main assets of Deceuninck windows and doors systems is their resistance to driving rain and their joint tightness.

Material & Structural Performance

The longevity and superior quality of this material has been conclusively proved for almost 40 years. Deceuninck material compound performs to worldwide standards for strength, durability, heat stability, colour retention, and termite resistance.

Maximum Wind Resistance

Due to their excellent material properties, Deceuninck windows and doors systems are ideal for being installed in buildings close to the sea where they are permanently exposed to strong wind, heavy rain and salty air.

Window

Four Seasons Deceuninck Tilt & Turn, Casement & Aunings windows are a modern engineering marvel. Proof that even the most technical aspects of design can yield beautiful results.

User friendly, modern and secure

Windows are the face of your house. Regardless of whether they are made of plastic, they brighten up rooms and thus cater to our well being. Needless to say, user friendliness must not be compromised and neither must windows give intruders an opportunity to break in. Innovative hardware technology for modern living.

Deceuninck windows give the priority to simplicity, and provides a perfect harmony with both the architecture and the decoration of your house. Its warm and soft lines bear the traces of a classical and modern style. Its rounded lines make you live the perfection not only with its image but also with the sense it provides when you touch it.

The design of Deceuninck windows has been purified from excess. The designers and engineers who made geometrical calculations of the frame has created wonders with technology and succeeded both in increasing resistance and in providing more light at the same time.

Deceuninck windows design bears all the advantages of symmetric profile. Deceuninck windows provides the same aesthetics both from the inside and the outside of your house. Open or closed; Deceuninck windows will be a part of the style of your house.

Deceuninck windows harmonizes easily with the style of your house by the help of its design and conception. All the parts have been designed for harmony in every finest detail.

Protection and Security

Everybody has a need for protection and security - from a young age right up to adult hood.

However security is not just about the protection of material possessions. It is more a case of being able to feel safe and secure in ones own house, without the fear of a burglary.

Solex Colours

Door

Deceuninck doors are more than clean lines looking and simple to maintain, and like all our products are guaranteed with no quibbles.

Are you on the safe side?

It's up to you! The safety of your home is in your hands. Hence, you should not rely on luck, but act.

Start, for example, with your front door. Most burglars give up their attempt to break in if a solid mechanical safety device appears invincible. Generally, a burglary attempt is called off latest after 3 minutes.

- Solid hinged
- One - piece multi point locking
- Effectively secured lock technology
- Security locking strikers
- Easy - to - use locking mechanics with key and/or lever operated.

Solex Colours

Roller Shutter

Windows are great for views, but sometimes you want to close them completely. Since most burglars gain entry through windows, a Deceuninck Roller Shutter to deter them makes good sense.

Protection

Roller shutters provide a layer of protection, reducing the risk of broken glass and reducing vulnerability of your home to break - in. Plus they provide a layer of insulation from heat, cold, noise, glare and also make sure you have complete privacy whenever you want it.

When the storm rages outside, roller shutters give your windows an additional layer of protection against flying debris. Also heat is kept outside, saving you valuable energy costs.

The Deceuninck Roller Shutters:

- are made from top quality window profiles according to European quality standards!
- are durable, ecologically friendly, weatherproof
- are resistant to aggressive city environment
- do not require any special maintenance
- have excellent heat and sound insulation
- show a modern window design
- make a home warm and comfortable.

Deceuninck Roller Shutters enhance the appearance of your home and add value to your property. They also provide a powerful psychological crime barrier and are welcomed by the insurances. Your benefit is additional heat insulation, saving you cooling (and heating) costs. Shutters protect the interior from sun glaze, heat and UV damage. Your house is kept cozy and comfortable. Deceuninck roller shutters also act as acoustic insulator, reducing noise levels significantly. Complete privacy when you need it and unobstructed view when you want it!

Flyscreen

Deceuninck has proved its difference with the genuine design of Sliding Flyscreen System which is one of the most significant necessities in the sector.

Deceuninck Sliding Flyscreen System is composed of the sash profile, the transom profiles and two different types of rail profile. The big rail (38 mm) is used for double rail frame and the small rail (22 mm) is used for single rail frame. Sliding Flyscreen System absolutely prevents the entry of flies and other insects with double brush application in compliance with the production details.

It is the only Sliding Flyscreen System with the possibility to be laminated completely. It may be laminated with the same color as the opening; therefore, it provides a visual integrity.

Bi - Fold

These elegant, concertina doors add a real “wow” factor to any home or premises, and seamlessly connect your outdoor and indoor spaces. Once folded back, they create a large opening for easy access. Particularly suited for new-build projects, these designer folding doors are becoming increasingly popular as property developers seek to differentiate their homes. Homeowners too are increasingly demanding more sophisticated products.

Deceuninck has carefully designed its bi-fold door system to offer smooth, simple functionality, with a bottom or top rail concertina mechanism, the versatility of the Deceuninck bi-fold door means that you can use it to create a glass wall up to an impressive 6 meters wide. As you'd expect.
